

ConClar Wire sludge scraper

ConClar 410 is a wire driven sludge scraper with a simple and competitive design. The sludge scraper has few moving parts, high reliability, designed for installation in rectangular sedimentation basins. ConClar Wire sludge scraper can be chosen independent of basin size and/or quantities of sludge. ConClar 410 can also be supplied with surface sludge removal if desired.

Benefits of ConClar 410:

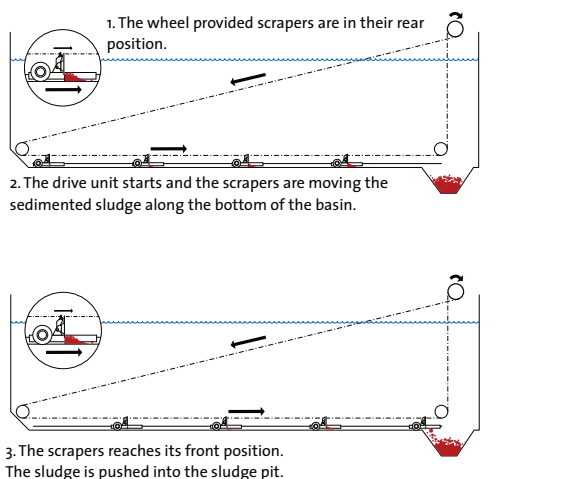

- Simple and reliable design
- Low investment cost
- Low wear and maintenance
- Low operating cost
- Flexible system
- Can be installed in basins with length up to 70 meter and width of 12 m
